The Smart Way (The way what companies do)

Instead of mixing them badly, you build:

ONE PLATFORM, TWO SERVICES

VSM Platform

Then inside:

1. **Loan Services**
2. **Photography Services**

Think like:

- Uber → rides + food (Uber Eats)
- Amazon → shopping + streaming + services

Same idea.

Best Architecture Idea

Option A

Single Website → Separate Modules

```
Home Page
  ├── Loans
  └── Photography
```

Each has its own:

- UI
- Dashboard
- Features

PREMIUM Features

We upgrade BOTH sides.

---

1. ADVANCED LOAN FEATURES

Smart Loan Eligibility Checker

Before applying:

User enters:

- Salary
- Expenses

System tells:

“You qualify for R3,500”

Credit Scoring System (Simple Version)

Score based on:

- Income
- Past loans
- Payment behavior

Display:

Credit Score: 72/100
Status: Good

Auto Debit Order Tracking

Since debit order is important:

- Track failed payments
- Auto-flag defaulters
- Send reminders

Late Payment Penalty System

Example:

If late → +5% penalty

Loan History Dashboard

User sees:

- Previous loans
- Paid loans
- Active loans

Real-Time Notifications

Use:

- Twilio (SMS)
- WhatsApp (API)

Admin Super Dashboard

Graphs:

- Revenue
- Active loans
- Defaults

---

2. PHOTOGRAPHY SYSTEM

Booking System

Clients can:

- Book events
- Select package
- Choose date

Package System

Example:

Basic - R1500
Standard - R3000
Premium - R5000

Calendar System

- Show availability
- Prevent double bookings

Online Payments

Same integrations:

- PayFast
- Ozow

Client Gallery (🔥 THIS IS BIG)

Each client gets:

- Private gallery
- Download photos

Event Management Dashboard

Admin sees:

- Upcoming events
- Payments
- Clients

---

3. POWER MOVE

"FINANCE YOUR EVENT" FEATURE

User wants:

Wedding photos → but no money

System offers:

"Apply for a loan to finance your photography package"

Now BOTH systems connect.

Flow:

1. User selects photography package

2. Clicks → “Pay with Loan”
3. Loan auto-created
4. Money linked to booking

---

4. UI / UX (MAKE IT BEAUTIFUL)

Use:

- Animations (fade, slide)
- Clean cards
- Smooth transitions

Libraries:

- GSAP (advanced animations)
- AOS

Design Style:

- Dark + gold (premium feel)
- Soft shadows
- Rounded cards
- Dashboard like fintech apps

---

5. FINAL STRUCTURE

```
VSM Platform
